

# Jaeyol Peter Lee

*AI Product Engineer | Multi-Agent Systems & Full-Stack Development*

Grapevine, TX 76051 | 785-505-0067 | [yiwoduf@gmail.com](mailto:yiwoduf@gmail.com) | [linkedin.com/in/leeable](https://linkedin.com/in/leeable) | [leeable.dev](https://leeable.dev)

---

## PROFESSIONAL OVERVIEW

AI product engineer and full-stack builder who owns features from data pipeline to AI orchestration layer to user-facing product surface. Works natively with agentic development tools, translating ambiguous requirements into shipped software through strong architecture, review, and product judgment. Combines React/Next.js/TypeScript delivery, backend APIs, PostgreSQL-oriented data modeling, and multi-agent system design to build AI-native products that feel immediate and useful to end users.

---

## WORK EXPERIENCE

**Independent AI Product Engineer** | Remote 2026 – Present

- Designed and built a production-grade multi-agent AI system (15+ agents) using a hierarchical orchestrator model on the Pi/OpenClaw runtime, with a Claude Code–inspired plugin-based harness layer, MCP integrations, and least-privilege tool scoping.
- Shipped a fully autonomous event-driven pipeline that crawls, scores, and routes 2,000+ records with zero manual intervention (data collection → n8n cron → Supabase/PostgreSQL → LLM evaluation → Notion/Discord).
- Built product-facing AI workflows connecting structured data, agent outputs, and Discord/Notion interfaces to deliver contextual recommendations with clear audit trails.
- Reduced LLM API cost by ~50% while preserving analysis quality through prompt engineering, harness design, model tiering, and workload partitioning.

**Software Developer III** | Paycom, Irving, TX 2025 – 2026

**Software Developer II** 2024 – 2025

- Promoted to Software Developer III and awarded a performance bonus as the most junior team member; led development/testing across 20+ test executions and 200+ engineering tickets.
- Designed and shipped an end-to-end system automating jurisdiction selection from candidate education, employment, and address data, owning the database schema, third-party API integration, and a new data model across 14 stories.
- Delivered a multi-module compliance feature end to end under a 3-week deadline, designing a progressive-disclosure UX that simplified complex eligibility workflows while handling edge cases cleanly.
- Built an internal agent orchestration harness for AI-assisted development in a security-restricted environment, standardizing safe agent workflows through PreToolUse/PostToolUse-style enforcement and codebase guardrails.

**Research Assistant — Web Developer** | University of Kansas, Lawrence, KS 2023 – 2024

- Built and shipped full-stack healthcare web applications for diabetes management, collaborating directly with UI/UX faculty researchers to bring research-backed designs to production.
- Applied a design-thinking approach end to end — translating real patient-survey insights into user-centered interface designs, then prototyping and iterating MVPs based on user feedback.
- Owned the full development cycle from Figma prototypes to deployed product (Next.js, React, TailwindCSS), shipping on Vercel to bridge academic research and usable, patient-facing software.

---

## TECHNICAL SKILLS

**AI & Agentic Systems:** Multi-Agent Systems, Agentic Orchestration, LLM Tool Calling, Model Context Protocol (MCP), Prompt Engineering, Harness Engineering, Structured Recommendations, RAG

**Automation & LLM APIs:** Workflow Automation, n8n, Anthropic API, OpenAI API, Streaming AI Outputs

**Languages & Frameworks:** TypeScript, JavaScript, React, Next.js, Tailwind CSS, Node.js, PHP, Python

**Data & Infrastructure:** MySQL, PostgreSQL, MongoDB, Supabase, Docker, Git, Vercel, CI/CD, Schema Design, Vector DB

**Developer Tools:** Claude Code, Cursor, Codex, OpenCode, OpenClaw, Figma, Jira

---

## CORE STRENGTHS

End-to-End Feature Ownership, AI-Native Workflow, Product Intuition, Systems Thinking, Ambiguous Requirements, Code Review Judgment, Data Pipeline Thinking, Continuous Learning, Attention to Detail

---

## EDUCATION

**B.S. Computer Science** | University of Kansas, Lawrence, KS 2020 – 2024

- Engineering Scholarship · GPA 3.6/4.0

**Kansas Academy of Mathematics and Science** | Fort Hays State University, Hays, KS 2018 – 2020

- Early College STEM Program
- Dean's Honor Roll · GPA 4.0/4.0 · Full-Year Academic Scholarship

---

## CERTIFICATIONS

Certificate in Entrepreneurship | University of Kansas 2024

---

## LANGUAGES

Fully Bilingual — English & Korean (Native)

---
