

Jaeyol Peter Lee

AI Product Engineer | Applied AI Engineer

Grapevine, TX 76051 | 785-505-0067 | yiwoduf@gmail.com | linkedin.com/in/leeable | leeable.dev

PROFESSIONAL OVERVIEW

A builder-minded AI product engineer who takes ideas from concept to shipped product with full end-to-end ownership. Thrives in ambiguity — self-directed, decisive, and energized by problems without a clear playbook. Combines strong systems thinking and product intuition with an AI-native workflow to ship production-grade multi-agent systems and autonomous pipelines. Driven by curiosity and discipline; learns fast, sweats the details, and leaves every system better than found. Turns evolving requirements into reliable, real-world solutions.

WORK EXPERIENCE

- Independent AI Product Engineer** | Remote 2026 – Present
- Partnered directly with clients to map their daily workflows, identify repetitive and high-friction steps, and turn them into AI products and workflow automations, owning discovery, solution design, full-stack implementation, and iteration.
 - Built a reusable multi-agent platform on Pi/OpenClaw with hierarchical orchestration, MCP integrations, hook-based guardrails, and least-privilege tool access, enabling new workflows to be launched without rebuilding core orchestration or safety controls.
 - Built and operated autonomous, event-driven RAG pipelines that ingest, analyze, embed, and index 500+ records per day using n8n, Supabase/PostgreSQL, and vector DB, generating recommendations and reports from retrieved context with traceable sources and no routine manual handling.
 - Reduced LLM API costs by ~50% while preserving analysis quality through prompt and harness design, model tiering, and workload partitioning.
- Software Developer III** | Paycom, Irving, TX 2025 – 2026
- Software Developer II** 2024 – 2025
- Promoted to Software Developer III and awarded a performance bonus for standout delivery as the most junior team member; served as Lead Developer / Lead Tester across 20+ test executions and 200+ engineering tickets.
 - Designed and shipped an end-to-end system automating jurisdiction selection from candidate data, owning the database schema, third-party API integration, and a new data model across 14 stories.
 - Delivered a multi-module compliance feature end to end under a 3-week deadline, designing a progressive-disclosure UX that simplified complex eligibility workflows while handling edge cases cleanly.
 - Built an internal harness for AI-assisted development in a security-restricted environment, standardizing and enforcing safe AI coding workflows across the team.
- Research Assistant — Web Developer** | University of Kansas, Lawrence, KS 2023 – 2024
- Built and shipped full-stack healthcare web applications for diabetes management, collaborating directly with UI/UX faculty researchers to bring research-backed designs to production.
 - Applied a design-thinking approach end to end — translating real patient-survey insights into user-centered interface designs, then prototyping and iterating MVPs based on user feedback.
 - Owned the full development cycle from Figma prototypes to deployed product (Next.js, React, TailwindCSS), shipping on Vercel to bridge academic research and usable, client-facing software.

Jaeyol Peter Lee

TECHNICAL SKILLS

AI & Agentic Systems: Multi-Agent Systems, Agentic Orchestration, LLM Tool Calling, Model Context Protocol (MCP), Prompt Engineering, Harness Engineering, RAG, CAG

Automation & LLM APIs: Workflow Automation, n8n, Anthropic API, OpenAI API, Ollama

Languages & Frameworks: TypeScript, JavaScript, React, Next.js, TailwindCSS, Node.js, PHP, Python

Data & Infrastructure: MySQL, PostgreSQL, MongoDB, Supabase, Docker, Git, Vercel, CI/CD, Vector DB

Developer Tools: Claude Code, Codex, OpenCode, OpenClaw, Figma

CORE STRENGTHS

End-to-End Ownership, Self-Directed Execution, Decision-Making Under Ambiguity, AI-Native Workflow, Product Intuition, Systems Thinking, Continuous Learning, Attention to Detail, Resilience & Discipline

EDUCATION

B.S. Computer Science | University of Kansas, Lawrence, KS 2020 – 2024

- Engineering Scholarship · GPA 3.6/4.0

Kansas Academy of Mathematics and Science | Fort Hays State University, Hays, KS 2018 – 2020

- Early College STEM Program
- Dean's Honor Roll · GPA 4.0/4.0 · Full-Year Academic Scholarship

CERTIFICATIONS

Certificate in Entrepreneurship | University of Kansas 2024

LANGUAGES

Fully Bilingual — English & Korean (Native)
